Idea for Dads and Kids

Halloween Smoothie
This is a great way to top up your “5 a day” as well as making it as grotesque as possible during the Halloween break! The quickest way to do this is to buy a 1 litre readymade smoothie. You will also need: a clear bowl, strawberry flavoured laces (sweets), green food colouring, marshmallows, a ladle and food colouring pens or a fine paintbrush and a selection of food colourings. Cut the marshmallows into shapes to look like eyeballs and draw the “pupil” with the food colouring pens or paint on with food colourings (add red lines around them to give that blood shot look). Pour the smoothie into a bowl, add a few drops of green food colouring, and stir until you get a murky colour. Hang the strawberry laces over the side of the bowl, with the eyeballs sitting on top of the bowl. When serving the smoothies, pull one of the strawberry laces out of the bowl and hang it over the glass, ladle in the smoothie and put an eyeball on top for that finishing touch.

[Another idea would be to add green food colouring to diluted orange, and put this into a bowl with a plastic hand or fingers floating on the top]

Grow Your Own
With the ‘Credit Crunch’ hitting everyone, why not try growing your own fruit and vegetables! As well as saving money, you get to spend time as a family outside and away from the TV and computer. It is also great if you have children who hate anything green. By learning where their food comes from, and looking after it right from the start, you could change the way they eat for the better. The following website link shows a video of a family from Belfast trying it out:
